

Dynamic Duos

Project Learning Tree Activity #26

Program of Studies

Science:

- S-4-LS-8 (All animals depend on plants for food.)
- S-4-LS-9 (Organisms change the environment. These changes may be detrimental or beneficial.)

Core Content

Science:

- SC-E-3.3.1 (Reproduction is a characteristic of all living systems and is essential to the continuation of every species. Some organisms reproduce asexually, others reproduce sexually. In species that reproduce sexually, including humans and plants, male and female sex cells carrying genetic information unite to begin the development of a new individual.)
- SC-E-3.3.3 (All organisms, including humans, cause changes in the environment where they live. Some of these changes are detrimental to the organism or to other organisms; other changes are beneficial (e.g., dams built by beavers benefit some aquatic organisms but are detrimental to others).)
